CXR200
AV RECEIVER

At Cambridge, our number one rule is that sound quality always comes first. With this in mind, we always ensure our AV receivers deliver the same audio performance levels as our award winning stereo amplifiers, meaning that you don't need two separate systems for music and movies. This, combined with the fact that the CXR120 and CXR200 can access music and movies from a wide variety of analogue, digital, wired and wireless sources, mean that these AV receivers are in a class of their own.

In addition to traditional HDMI, digital and analogue inputs for music and movies, the CXR120 and CXR200 have extensive network and wireless music playback capabilities. Streaming music over your home network or from USB hard drives, they can play everything from compressed MP3 formats, up to 24-bit/192kHz studio master quality FLAC, WAV and Apple Lossless files. Their wireless playback capabilities also include internet radio, Spotify and even Bluetooth. There's even support for DSD, allowing you to playback SACDs from your Blu-ray or universal player.

The CXR120 and CXR200 both use a highly-efficient Class A/B amplifier design, an audiophile grade oversize toroidal transformer and substantial extruded heat sink. This allows the CXR120 to deliver 120 Watts per channel. The CXR200 goes even further and outputs 200 Watts per channel, making it one of the most powerful AV receivers in its class!

KEY CXR120 & CXR200 FEATURES

Versatile setup

The CXR120 and CXR200 feature height channel processing. When using a 5.1 set-up, the unused 6th and 7th speaker channels can be used instead for overhead 'height' effects.

The CXR200 goes even further and has a Zone 2 and a bi-amp mode. This allows you to use the 6th and 7th speaker channels to bi-amp the front left and right channels or send audio into a second room.

Zone 2 connections (CXR200 only)

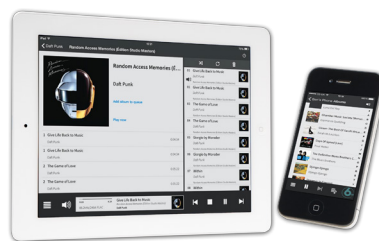

Continuing the versatile specification, the CXR200 also allows you to run an independent Zone 2. The second HDMI output can be assigned to send high quality HDMI video into a second room and has selectable Zone 2 audio outputs to match the video. This means you can run audio and video into a second room and then watch or listen to different sources in both rooms. Zone 2 can be controlled by the main remote control or the Cambridge Connect app.

Twin video outputs

The CXR120 and CXR200 have two HDMI outputs. These can be used to run two displays at the same time; ideal if you have a screen in a second room, or want to use a projector for movies but a TV screen for day to day use. ARC (Audio Return Channel) is supported on HDMI 1 output, allowing you to send the audio signal from a TV through the CXR120 or CXR200 without an additional audio connection from the TV. The CXR200 also has a clever Zone 2 feature. The second HDMI output can be assigned to send high quality video into a second room and has selectable Zone 2 audio outputs to match the video.

Easy to use!

The CXR120 and CXR200 have a new intuitive colour On-Screen Display and simple, user-friendly controls, plus a handy backlit remote, ensuring its vast range of features are easy to access and understand –even in the dark!

Network music and App control

Both AV receivers feature the streaming module from the CXN network music player. Over Wi-Fi or Ethernet connection, the CXR120 and CXR200 can play any music that it sees on the network, including all popular formats such as FLAC, Apple Lossless and WAV. Playback from USB hard drives and from other services such as Spotify and internet radio is also supported. The free Cambridge Connect App for iOS and Android devices brings the whole experience to life. Whether it's flicking through album artwork, building playlists or setting presets, the app allows intuitive browsing and navigation of all your music. The App can also control power on/off, source selection and volume of the CXR120 and CXR200.

Simple set-up

Using the colour On-Screen Display, you can easily setup the CXR120 and CXR200 by yourself using the auto speaker setup. For quick and simple installation in any room this system uses the supplied microphone to perform multiple measurements of the listening environment and automatically sets the receiver up for optimum use dependent on your room's acoustics.

Bluetooth: enhance your Apps

Bring the CXR120 and CXR200's stunning audio quality to all your apps and streaming services via your smart phone, tablet or computer. Just pair your device to the optional BT100 Bluetooth dongle and listen to popular apps and services such as YouTube played back in stunning quality through the CXR120 and CXR200. Anything you play on your tablet or smart phone will sound far superior when played back wirelessly through the CXR120 or CXR200.

All the power of Spotify, built in

Spotify Connect is integrated with the CXR120 and CXR200. If you subscribe to Spotify Premium, you can play all of your Spotify music and playlists and control the CXR120 and CXR200 with the Spotify Connect app on your phone or tablet.

Mobile High-definition Link

The front panel HDMI input also supports MHL. Mobile High-definition Link (MHL) can be used to connect to an MHL compatible mobile device such as a cell phone or a digital camcorder, to play high quality audio and video content back through the CXR120 or CXR200.

File formats

The CXR120 and CXR200 support all popular CODECs including, 'better than CD' quality 24-bit/192kHz FLAC/Apple Lossless/WAV/AIFF files, plus WMA, MP3, AAC, HE AAC, AAC+ and Ogg Vorbis formats.

Class-leading connectivity

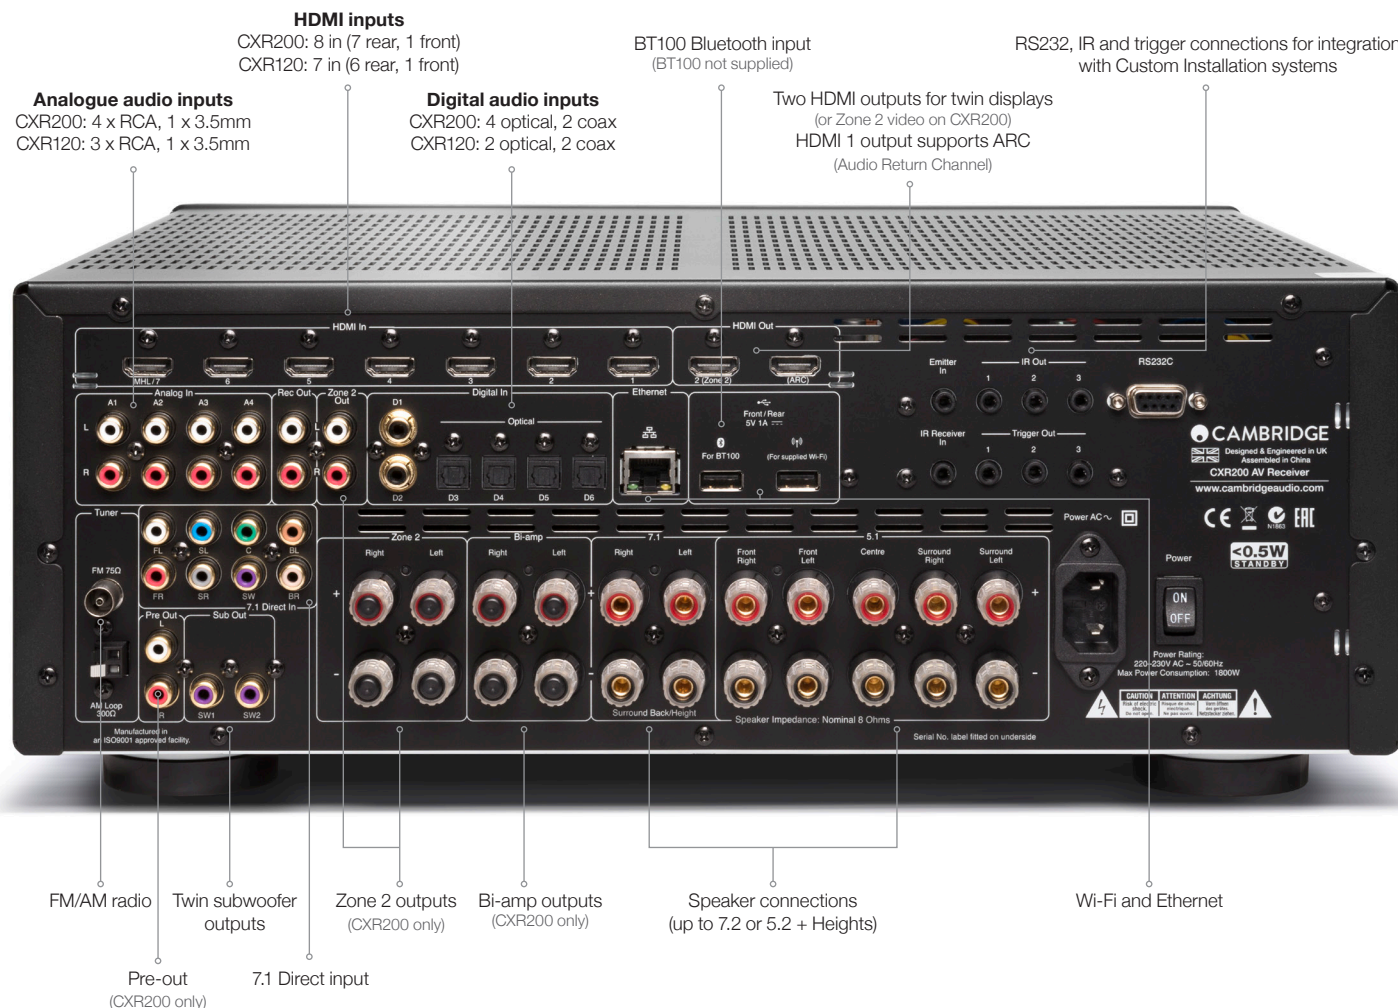

As well as comprehensive audio capabilities, the CXR120 and CXR200 have a full range of top-end home cinema receiver features; 7.1 analogue inputs, twin subwoofer outputs, and a comprehensive range of HDMI 2.0 inputs and outputs, all of which are 4K, 3D and HDCP 2.2 compatible. There's also a host of other wired and wireless connections so that wherever your music or movies come from, you can play it all back in stunning quality with the CXR120 and CXR200:

Wired inputs:

- HDMI 2.0 connections to Blu-ray players, set-top boxes and games consoles, etc.
- Digital audio inputs including S/PDIF coaxial and TOSLINK optical.
- 7.1 Direct In, RCA and 3.5mm analogue audio inputs.
- Ethernet: network connection for UPnP music streaming, internet radio and music streaming services.
- USB HDD (Hard Disc Drives) and memory sticks.

Wireless inputs:

- Wi-Fi: network connection for UPnP music streaming, internet radio and music streaming services.
- Spotify Connect is supported for playback of Spotify music and playlists through the CXR120 and CXR200.
- Bluetooth playback via the optional BT100 Bluetooth receiver.
- FM/AM radio.

THESE AV RECEIVERS DELIVER POWERFUL PROCESSING AND EXCEPTIONAL QUALITY AUDIO...
HERE ARE 10 REASONS TO CHOOSE THE CAMBRIDGE CXR120 AND CXR200 OVER OTHER SYSTEMS...

1.

The hub of music and video

No need to buy two devices for sensational surround sound and great music. Combine the quality and power of a true hi-fi amplifier, with the connectivity and functionality of an AV receiver and streaming capabilities of a network music player. Simple control from the Cambridge Connect app and the front panel ensures everyone can enjoy these AV receivers.

2.

Pure power

The CXR120 and CXR200 both use a highly-efficient Class A/B amplifier design, an audiophile grade oversize toroidal transformer and substantial extruded heat sink. This allows the CXR120 to deliver 120 Watts per channel. The CXR200 goes even further and outputs 200 Watts per channel, making it one of the most powerful AV receivers in its class!

3.

Great connectivity

With many analogue, digital and HDMI inputs, it's almost impossible to run out. You can connect all of your AV equipment including Blu-ray, satellite TV, games consoles, MP3 players, CD players and more, plus there's a built in AM/FM tuner too. The built-in network streaming module adds a host of wired and wireless streaming possibilities. There's even support for DSD, allowing you to playback SACDs from your Blu-ray or universal player.

4.

Network music and USB connectivity

Via UPnP, you can play music files stored on computers, laptops or NAS drives. Additionally, there's a USB input for music stored on USB HDDs (memory sticks or external USB drives). You can even listen to internet radio and control everything from the free Cambridge Connect app for iOS and Android devices.

5.

Bluetooth connectivity

You can add Bluetooth connectivity to your CXR120 or CXR200 by using the optional BT100 Bluetooth receiver. As well as the Standard Bluetooth Codec (SBC), this also supports the higher quality Bluetooth system, aptX, which is supported by more and more devices and sounds even better, meaning you can get the best possible results from any Bluetooth device.

6.

Spotify Connect

Spotify Connect is supported for playback of Spotify music and playlists through the CXR120 and CXR200.

7.

Quick set-up

AV receivers can involve arduous set-up and configuration processes, but the CXR120 and CXR200 are quick and simple thanks to the colour On-Screen-Display and auto speaker setup. The supplied microphone measures the listening environment and automatically sets the speaker levels and distances for your room.

8.

Zone 2

The CXR200 allows you an independent zone 2. The second HDMI output can be assigned to send high quality HDMI video into a second room and has selectable Zone 2 audio outputs to match the video. This means you can run audio and video into a second room and then watch or listen to different sources in both rooms.

9.

Play all file types

The CXR120 and CXR200 have a comprehensive range of HDMI inputs and outputs, all of which are 4K and 3D compatible. From networks and USB hard drives, they can play all popular CODECs including, 'better than CD' quality 24-bit/192kHz FLAC/Apple lossless/WAV/AIFF files, plus WMA, MP3, AAC, HE AAC, AAC+ and Ogg Vorbis formats. So, wherever your music comes from, and whatever the format, it will sound amazing when played through the CXR120 or CXR200.

10.

All metal design

Electronics (and therefore sound quality) are particularly susceptible to vibration; that's why we've used a low resonance, acoustically-dampened metal chassis to eliminate as much vibration as possible; ensuring that the highest sound quality is extracted from each audio source.

CXR120

Power output: 120 watts RMS per channel, 6 ohms (two channels driven), 100 watts RMS per channel, 8 ohms (two channels driven), 60 watts RMS per channel, 8 ohms (all 7 channels driven)

HDMI: HDMI 2.0, HDCP 2.2, ARC supported on HDMI 1 output

Audio Inputs: 3 x Analogue, Tuner (FM/AM), 7.1 multi-channel analogue direct, 2 x digital coaxial, 2 x optical

Video Inputs: 7 x HDMI 2.0 (6 x rear, 1 x front panel, 1 x MHL compatible)

Main Audio Outputs: 7 Amplified Speaker Outputs, 2 x subwoofer outputs

Video Output: 2 x HDMI 2.0, ARC through HDMI 1

Other connections: 1 x 1/4" / 6.35mm Headphone Output (32 To 600 ohms recommended), IR emitter input, IR receiver input, 2x IR outputs, 2 x 12V trigger outputs, 1 RS232C, 1 IEC type mains inlet, Wi-Fi module, RJ45 Ethernet, BT100 Bluetooth (BT100 not supplied), Spotify Connect

Audio formats (network streaming and USB HDD): ALAC, WAV, FLAC, AIFF, WMA, MP3, AAC, HE AAC, AAC+, OGG Vorbis (16-24 bit, 11.025-192kHz), DSD (via HDMI)

Max power consumption: 1000W

Standby power consumption: <0.5W

Dimensions (H x W x D)*: 165 x 430 x 420mm (6.5 x 16.9 x 16.5")

Weight: 13.2kg (29lbs)

CXR200

Power output: 200 watts RMS per channel, 6 ohms (two channels driven), 170 watts RMS per channel, 8 ohms (two channels driven), 120 watts RMS per channel, 8 ohms (all 7 channels driven)

HDMI: HDMI 2.0, HDCP 2.2, ARC supported on HDMI 1 output

Audio Inputs: 4 x Analogue, Tuner (FM/AM), 7.1 multi-channel analogue direct, 2 x digital co-axial, 4 x optical

Video Inputs: 8 x HDMI 2.0 (7 x rear, 1 x front panel, 2 x MHL compatible)

Main Audio Outputs: 7 Amplified Speaker Outputs, L+R preamp outs, 2 x subwoofer outputs

Video Output: 2 x HDMI 2.0, ARC through HDMI 1, Zone 2 through HDMI 2

Zone 2 outputs: 1 x HDMI 2.0, 1 x Preamp, 1 x pair of amplified speaker outputs

Other connections: 1 x 1/4" / 6.35mm Headphone Output (32 To 600 ohms recommended), IR emitter input, IR receiver input, 3 x IR outputs, 3 x 12V trigger outputs, 1 RS232C, 1 IEC type mains inlet, Wi-Fi module, RJ45 Ethernet, BT100 Bluetooth (not supplied), Spotify Connect

Audio formats (network streaming and USB HDD): ALAC, WAV, FLAC, AIFF, WMA, MP3, AAC, HE AAC, AAC+, OGG Vorbis (16-24 bit, 11.025-192kHz), DSD (via HDMI)

Max power consumption: 1800W

Standby power consumption: <0.5W

Dimensions (H x W x D)*: 165 x 430 x 420mm (6.5 x 16.9 x 16.5")

Weight: 15.7kg (34.5lbs)

CAMBRIDGE: OUR STORY

Since 1968 Cambridge has been driven by a simple belief; that music should always sound amazing. Cambridge is for people who really listen to music.

Our original British-designed products are enjoyed the world over by people like you who share a love of music.

We have an envied reputation for innovation and every one of our engineers is fanatical in their pursuit of delivering an authentic and enjoyable experience. When you listen to a Cambridge product you don't just hear the difference, you feel it.

We want everyone to experience that pleasure. We love music and we're proud of what we do. Our passion for listening to great music and the fun we have in the process of creating the products we make shines through, for all to see and hear.

We're all music lovers, plain and simple and we want to share that love. Because great things happen when people who love music, design hi-fi!
